

With a turnkey solar solution, simplified incentive application and pre-packaged financing solutions, Solect can help your small business go solar in a matter of days.

Smart Solar. Smart Business.

Not only is solar energy a good decision for the environment, in Massachusetts it's also a smart financial decision.

- Reduces or even eliminates electricity costs
- Offers an attractive return on investment
- Delivers a quick payback
- Hedges against rising energy costs

As a leading commercial-scale solar company in Massachusetts, Solect has helped over 200 local businesses control their electricity costs and generate revenue with solar energy. Our system management and SREC services keep our client's investments optimized for maximum ROI.

"Solect has established itself as a leader in commercial solar projects in Massachusetts, and was able to prove to us on paper that solar was a viable financial option for Consigli. They truly understood what we needed, and why."

Anthony Consigli
President, Consigli Construction

Incentives for Small Businesses

Recently, the state allocated financial incentives specifically designated for solar systems up to 25 kW. This is great news for the thousands of small to medium sized businesses that call the Commonwealth their home. **This incentive will be awarded on a "first come, first serve" basis and will likely fill up within a couple of months.**

We can assist in taking advantage of Massachusetts' solar incentive program and help you reap the benefits of solar energy.

Solar Made Simple.

- Turnkey solar solution
- Simplified incentive application
- Pre-packaged financing solution
- Go solar in a matter of days!

Pre-packaged Financing Solutions

Solect is offering three “all-in-one” solar financing solutions for small to medium commercial businesses - including options that **require little to no up-front costs**.

1. Solect Solar Loan

Own the solar PV system outright utilizing a bank loan. Solect is proud to offer the Solect Solar Loan, featuring attractive rates and an easy application.

2. Solect Operating Lease

Operating leases lower overall system cost by 35% to 45% when the bank monetizes the Federal Income Tax Credit (ITC) & depreciation expense, creating a positive cash flow throughout the term.

3. Solect Capital Lease

Capital Leasing enables clients and prospects 100% financing as an alternative to using cash or bank loans.

Lease advantages

- Enables 100% financing
- Lowers the overall system cost
- Construction financing costs can be included during the construction phase. Typically interest only at Prime Rate + 2%
- Easy one page credit application process decision within 48 hours. No requirement for 3 years of tax returns, or bank statements.
- Allows you to benefit from ITC /Depreciation by reducing payments making solar affordable.
- Operating lease payments are 100% tax-deductible.
